

## Introduzione

### Sostituzione rubinetto a galleggiante

# Sostituzione del vecchio rubinetto a galleggiante

I rubinetti a galleggiante di vecchia generazione possono essere sostituiti con il rubinetto a galleggiante Tipo380. Il corpo compatto del Tipo380 permette un'installazione universale sia all'interno di una **cassetta di risciacquo da incasso** che su **cassette esterne, anche di produttori terzi**.
